Summary

Creative UI/UX and Product Designer with 4 years of experience crafting user-centered digital experiences for web and mobile platforms. Skilled in translating complex business requirements into intuitive, visually engaging solutions that enhance usability and drive product growth. Proficient in end-to-end design processes including user research, wireframing, prototyping, interaction design, usability testing, and design systems, withexpertise in tools such as Figma, Adobe XD, Sketch, and InVision. Strong understanding of information architecture, user flows, responsive design, and accessibility (WCAG), combined with a solid foundation in design thinking and human-centered design principles.

Skills

UI/UX & Product Design: User Interface (UI) Design, User Experience (UX) Design, Product Design, Interaction Design, Visual Design, Human-Centered Design, Design Thinking, UX Strategy, Experience Design, Mobile-First Design, Responsive Design, Accessibility (WCAG), Inclusive Design, AI-Enabled Product Design

Research, Strategy & Analysis: User Research, User Interviews, Usability Testing, Heuristic Evaluation, A/B Testing, Persona Development, Journey Mapping, User Flows, Information Architecture, Analytics Interpretation

Design Process & Deliverables: Wireframing, Prototyping, Low-Fidelity & High-Fidelity Designs, Interactive Prototypes, Design Systems, Design Tokens, Style Guides, Component Libraries, Micro-interactions, Interaction Flows, Design Documentation, UX Writing Basics, Visual Assets, Data Visualization

Tools, Technologies & Development: Figma (Auto Layout, Variables, Dev Mode), Sketch, Adobe Creative Cloud (Photoshop, Illustrator), Framer, InVision, Miro, ProtoPie, Zeplin, FigJam, Balsamiq, Webflow, Notion, HTML, CSS, JavaScript, React, Cross-browser Compatibility, ARIA

Collaboration & Methodologies: Agile/Scrum, Cross-functional Collaboration, Stakeholder Management, Developer Handoff, Design Reviews, Sprint Planning, Communication Skills, Time Management, Iterative Design Process

Experience

UX/UI Designer, *Clay* — Oct 2025 – Present | Remote, USA

- Managed UI/UX design for a venture platform, conducting user research, stakeholder interviews, and competitive analysis to define user flows, information architecture, and product strategy, ensuring alignment with business and user goals.
- Redesigned the donation and onboarding experience by simplifying a multi-step flow into a single-page interface, applied usability testing, heuristic evaluation, and A/B testing to improve interaction design and accessibility (WCAG 2.2).
- Created wireframes, high-fidelity UI designs, and interactive prototypes using Figma (Auto Layout, Dev Mode), delivering scalable and responsive solutions across web and mobile platforms.
- Developed a robust design system with reusable components, design tokens, and developer-ready specifications (including ARIA and responsive breakpoints), streamlining developer handoff and ensuring cross-browser compatibility.
- Achieved a 45% reduction in user errors for 500+ users and decreased design-to-development iterations by 30%, significantly improving conversion rates, usability, and overall product efficiency.

UI/UX Design Assistant, *DePaul University* — Nov 2023 - Aug 2025 | Chicago, USA

- Led UX research and Figma design for matching platform (500+ users), interviews, diary studies, card sorting, and tree testing optimized IA/user flows, created responsive wireframes, UI, and prototypes with WCAG 2.1/AA accessibility.
- Validated and iterated designs through 3+ rounds of usability testing, heuristic evaluation, and data-driven insights, achieving an 85% task completion rate and significantly improving navigation efficiency and user experience.
- Led Design Thinking workshops and collaborated with cross-functional teams (PMs, developers) in Agile/Scrum, delivered developer-ready specs, slashing approval cycles by 70% and design rework by 55% for scalable solutions.

UI/UX Junior Designer, *Technoboot* — Mar 2022 – July 2023 | India

- Revamped cloud-based SaaS platform via heuristic evaluation, usability testing, and user analysis, restructured information architecture and standardized interactions, cutting user friction 30% and boosting retention 40% for 300+ users.
- Redesigned a dashboard by applying visual hierarchy, progressive disclosure, and data visualization best practices, reduced cognitive load by simplifying data points (28 → 17), resulting in an increase in daily active usage from 42% to 67%.
- Optimized engaging micro-interactions, including a streak counter feature, leveraging A/B testing and analytics-driven insights, improved 30-day user retention by 41% and enhanced overall user engagement.
- Established a scalable design system with typography, color tokens, reusable components, and consistency guidelines; improved UI consistency score from 2.1 to 4.3/5 and ensured alignment across cross-functional teams and product modules.
- Developed company's first responsive website using HTML, CSS, Bootstrap, and JavaScript, delivered dynamic cost estimator and online booking system, boosting user engagement 28% and digital presence.

Education

Master of Science in Human-Computer Application, *DePaul University* — Aug 2023 - Sep 2025 | USA

Bachelor of Architecture, *Dayananda Sagar College of Architecture* — Aug 2017 - Sep 2022 | India
