Summary

Product & UX Designer with 3+ years of experience and a Master's in Human-Computer Interaction, specializing in designing end-to-end user experiences for complex enterprise products and scalable digital solutions. Skilled in user research, interaction design, and systems thinking to translate ambiguous requirements into intuitive, and developer-ready designs. Ability to streamline workflows, improve usability, and deliver impactful product outcomes. Leverages AI-assisted design processes to accelerate research, prototyping, and delivery while maintaining high standards of usability, accessibility, and execution.

Skills

Product & UX Design: Product Design, User Experience (UX) Design, User Interface (UI) Design, Interaction Design, Human-Centered Design, Design Systems, Responsive Design, Accessibility (WCAG)

User Research & Strategy: User Research, Usability Testing, User Flows, Information Architecture, Journey Mapping, Persona Development, A/B Testing, Data-Driven Design

Design & Prototyping: Wireframing, High-Fidelity Design, Interactive Prototypes, Component Libraries, Micro-interactions

Tools & Technologies: Figma (Auto Layout, Components, Dev Mode), Adobe Creative Suite (Photoshop, Illustrator), FigJam, Miro, Webflow, HTML & CSS

Product Thinking & Collaboration: Agile/Scrum, Cross-functional Collaboration, Stakeholder Management, Developer Handoff, Design Reviews, Iterative Design Process

Experience

UX/UI Designer, *Clay* — Oct 2025 – Present | Remote, USA

- Managed UI/UX design for a venture platform, conducting user research, stakeholder interviews, and competitive analysis to define user flows, information architecture, and product strategy, ensuring alignment with business and user goals.
- Redesigned the donation and onboarding experience by simplifying a multi-step flow into a single-page interface, applied usability testing, heuristic evaluation, and A/B testing to improve interaction design and accessibility (WCAG 2.2).
- Created wireframes, high-fidelity UI designs, and interactive prototypes using Figma (Auto Layout, Dev Mode), delivering scalable and responsive solutions across web and mobile platforms.
- Developed a design system with reusable components, design tokens, and developer-ready specifications (including ARIA and responsive breakpoints), streamlining developer handoff and ensuring cross-browser compatibility.
- Achieved a 45% reduction in user errors for 500+ users and decreased design-to-development iterations by 30%, significantly improving conversion rates, usability, and overall product efficiency.

UI/UX Design Assistant, *DePaul University* — Nov 2023 - Aug 2025 | Chicago, USA

- Improved UX research and Figma design for matching platform (500+ users), interviews, diary studies, card sorting, and tree testing optimized IA/user flows, created responsive wireframes, UI, and prototypes with WCAG 2.1/AA accessibility.
- Validated and iterated designs through 3+ rounds of usability testing, heuristic evaluation, and data-driven insights, achieving an 85% task completion rate and significantly improving navigation efficiency and user experience.
- Scheduled Design Thinking workshops and collaborated with cross-functional teams (PMs, developers) in Agile/Scrum, delivered developer-ready specs, slashing approval cycles by 70% and design rework by 55% for scalable solutions.

UI/UX Junior Designer, *Technoboot* — Mar 2022 – July 2023 | India

- Revamped cloud-based SaaS platform via heuristic evaluation, usability testing, and user analysis, restructured information architecture and standardized interactions, cutting user friction 30% and boosting retention 40% for 300+ users.
- Customized a dashboard by applying visual hierarchy, progressive disclosure, and data visualization best practices, reduced cognitive load by simplifying data points (28 → 17), resulting in an increase in daily active usage from 42% to 67%.
- Optimized engaging micro-interactions, including a streak counter feature, leveraging A/B testing and analytics-driven insights, improved 30-day user retention by 41% and enhanced overall user engagement.
- Established a scalable design system with typography, color tokens, reusable components, and consistency guidelines; improved UI consistency score from 2.1 to 4.3/5 and ensured alignment across cross-functional teams and product modules.
- Enhanced company's first responsive website using HTML, CSS, Bootstrap, and JavaScript, delivered dynamic cost estimator and online booking system, boosting user engagement 28% and digital presence.

Education

Master of Science in Human-Computer Interaction, *DePaul University* — Aug 2023 - Sep 2025 | USA

Bachelor of Architecture, *Dayananda Sagar College of Architecture* — Aug 2017 - Sep 2022 | India

Projects

UttisthaNow

Designed a behavioral health experience that encourages daily movement through micro-nudges, structured breaks, and emotion-aware prompts. Applied behavioral design thinking, habit formation principles, and user-centered interaction design to reduce inactivity and support sustainable routines.

RAG-Based AI Commerce Platform (Active)

Designing an AI-powered commerce platform with conversational shopping, semantic search, and kiosk-based navigation for a 2,900+ product catalog, focused on improving large-scale product discovery through flow, intelligent retrieval, and intuitive retail interaction.
